SIMPLIFYING SMART BUILDINGS

CLOUD-BASED
ACCESS CONTROL
THAT SEAMLESSLY
INTEGRATES WITH
POWERFUL VIDEO
SECURITY.

PBC Technologies is a registered Verkada Partner and Solution Installer. Verkada Access Control combines enterprise-grade access control with a powerful, cloud-based management platform for a solution that's always simple, secure, and ready for scale.

Starting with Verkada's Access Controller, users are able to bring plug-and-play simplicity to managing doors and access across their organization. Access Controllers work with your building's existing door hardware and readers. Once doors are connected, they're ready to be managed from any device via Verkada Command. The Verkada Command platform allows you to easily manage building access, schedules and users. Integration to active directory platforms ensure that employees are automatically configured, onboarded and offboarded.

Through Verkada Command, access control and cameras are connected seamlessly to deliver real-time video analytics on access events. Using Verkada's industry-leading edge-based video processing, users are able to not only see what is happening at their points of entry, but also proactively take action for meaningful events.

The PBC Difference

Smart buildings can get complicated quickly and most smart building product suppliers can not deliver a quality installation which is crucial to any systems success. PBC Technologies has the expertise in both smart building design and smart building product integration and installation. We are your end-to-end smart building partner.

Verkada's Hybrid Cloud Architecture

Hardware Reconsidered

Redesigned control panel that can be used with existing card readers

Easy to Scale

No servers, databases, or on-prem clients to manage – simply just plug-in and add doors

Centralized Management

Modern platform enables secure access on any device from anywhere in the world

The reliability of on-device solid-state storage, with the accessibility of the cloud

Simple to Install

- No servers, thick or thin clients
- Doors come online and configure in minutes
- No added software or complexities like port forwarding

Easy to Use

- Centralized management for seamless access vertically anywhere
- No training required to access footage and features
- Access doors from any device
- Seamlessly add and integrate video security

Advantages of Cloud-Managed Solution

- Cloud-based access control for easy management across all sites and users
- Manage all sites and users across your organization
- Secure remote access on any device anywhere
- SAML-based integration with single-sign on (SSO) solutions
- Continuous updates with new features
- Instantly share live footage via SMS and email

Ready For Scale

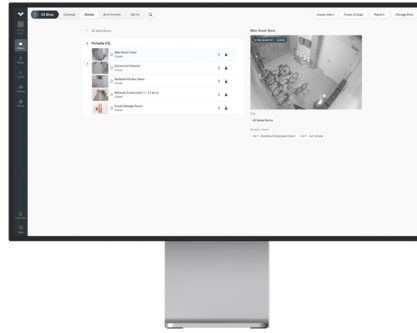

- Cloud-based platform has no device/user limits
- Scale to thousands of doors across all locations
- No need to create virtual networks to sync access across sites

No Hidden Costs

- Automatic firmware updates keep systems secure
- New features and enhancements are added at no additional costs

Access Software Overview
Powerful Features to
gain greater visibility
and control into your
sites

Verkada Command

A Command, Verkada's cloud-based management software, is designed to deliver simple access and management for all doors, peripherals, cameras, and users across all sites from virtually anywhere in the world.

AC41 — 4-Door Controller

Built from the ground-up, the AC41 provides security without the complexity

- Cloud-managed controller configures instantly and updates automatically.
- Built-in storage ensures uninterrupted door functionality.
- Managing doors, permissions, and users from anywhere with Verkada Command.
- Seamlessly integrates with existing Verkada cameras for unparalleled visibility.
- Simplified wiring with an integrated cable management system and screwless push-spring terminals.
- Works with 3rd party readers and credentials.
- Built-in testing interface for wired connections.
- Integrated power supply powers most door strikes and handles without additional wiring.

Touchless Entry via BLE

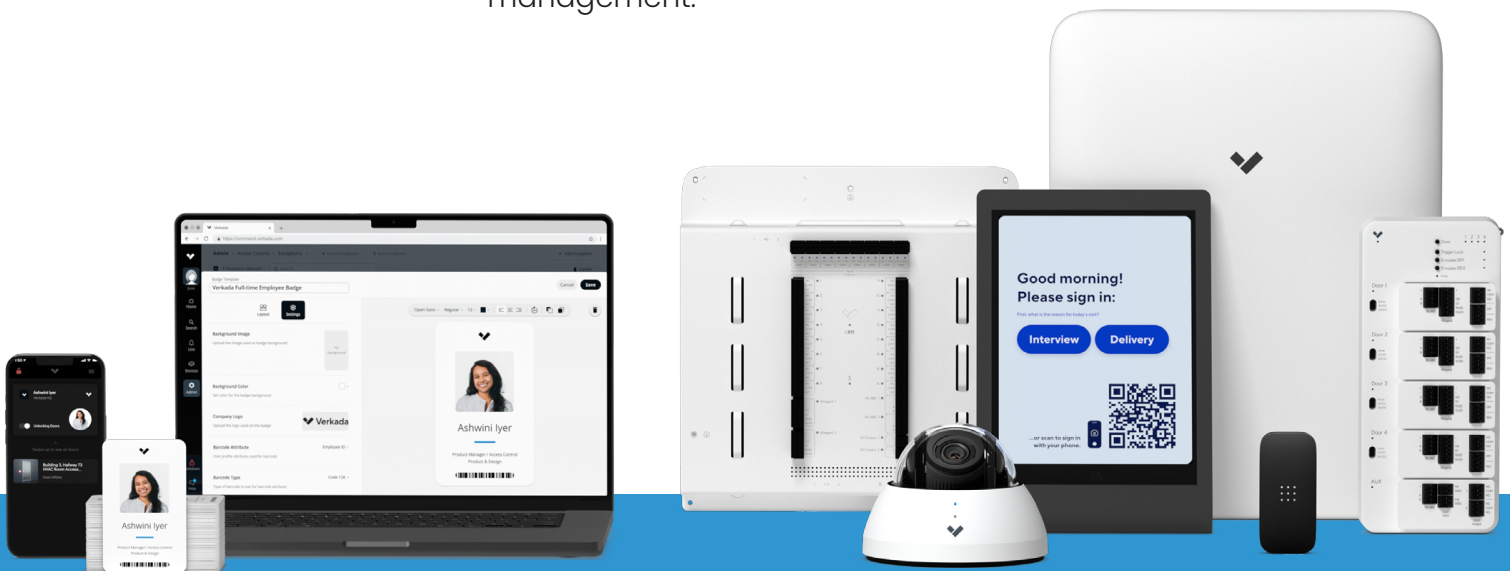

Verkada Pass App

The Verkada Pass app makes it easy to unlock doors by just using your phone. By either tapping from inside the app or through Touchless Access made possible with Bluetooth, it has never been an easier, more convenient way to access buildings. The Verkada Pass app is available on iOS and Android.

Protect students and schools with integrated Access Control

Verkada Access Control provides real-time visibility into access-based events across campuses. School administrators can:

- Reduce liability and increase visibility by removing physical lock and key.
- Design, manage, print, and issue student and faculty ID badges natively from within your access control system with Verkada Command.
- Automate response policies with real-time alerts, alarms or notifications. View events remotely from mobile or desktop.
- Secure classroom doors with Schlage Wireless Locks to bring every door onto one cloud-based platform for easy management.

Key Benefits

Native Camera Integration

Bring access events and video footage together by adding cameras to doors in just a few clicks.

Simple to install

With Verkada Access Control, you can add doors easily and quickly. Doors can be brought online in minutes.

Centralized management

Manage multiple campuses behind a single pane of glass, and empower end-users with an intuitive, cloud-based software platform.

Easy to use

Empower end-users with an intuitive software platform to reduce the dependence on your IT team.

About PBC Technologies

PBC Technologies is a reliable and trustworthy partner for your business, with a mission to break down the barriers of digital transformation. Our intuitive and scalable solutions are designed to be cost-effective, high performing, easy to maintain, and generate returns on intelligence for your business.

One of our greatest strengths is the ability to provide a single-source vendor experience for connected building systems and devices, which reduces wiring and installation costs, configuration time, and facilities expenses. This streamlined approach saves you time and money while ensuring that all of your systems work seamlessly together.

At PBC Technology, we are dedicated to being your essential partner for the successful deployment of your Verkada System. Our mission is to seamlessly integrate diverse components, technologies, and subsystems to create a cohesive, efficient, and high-performing solution tailored to your unique needs.

Our team of experts possesses specialized knowledge and experience, ensuring that we recommend the most appropriate solutions and components to meet performance, reliability, and security expectations. We pride ourselves on our ability to

manage complex projects, ensuring seamless integration of various components while staying on schedule and within budget. Our commitment to customization allows us to adapt to your specific requirements, providing comprehensive training and ongoing support to ensure your system operates effectively.

By partnering with PBC Technology, you can enjoy cost savings and increased efficiency, as we continuously identify opportunities for consolidation, optimization, and automation. Choose PBC Technology for a successful Verkada System deployment that meets the specific needs of your project, ensuring a functional, reliable, and efficient solution.
