

Simplifying Smart Buildings

SIMPLIFYING SMART BUILDINGS

The PBC Difference

Smart buildings can get complicated quickly and most smart building product suppliers can not deliver a quality installation which is crucial to any systems success. PBC Technologies has the expertise in both smart building design and smart building product integration and installation. We are your end-to-end smart building partner.

Our team of continuously educated engineers and trained technicians bring a highly motivated and passionate delivery to each project.

We help facilitate the transformation of traditional buildings into smart buildings that generate returns on intelligence. We specialize in Network Services, Smarty Security Solutions and Building Controls.

One of PBC's greatest strengths is the ability to provide a single-source vendor experience for connected building systems and devices, which reduces wiring and installation costs, configuration time, and facilities expenses. This streamlined approach saves you time and money while ensuring that all of your systems work seamlessly together.

WHAT OUR CUSTOMERS SAY ABOUT US

PBC Technologies is a reliable and trustworthy partner for your business, with a mission to break down the barriers of digital transformation. Their intuitive and scalable solutions are designed to be cost-effective, high performing, easy to maintain, and generate returns on intelligence for your business.

Easy to work with, as far as scheduling and planning, just helpful to be honest with you. They are my go-to's, I'm the type that when something is working why break it. I see this as being a very good long term relationship with PBC.

Diane Warden

Dallas Zoo - Senior Director of Safety & Security

PBC Technologies provided exceptional service and expertise in designing and implementing a custom network infrastructure and security system for our facility. They listened carefully to our needs and provided tailored recommendations that addressed our unique security and compliance requirements. They were professional, efficient, and responsive throughout the entire process, and their attention to detail and commitment to quality were evident in the final result.

Verkada's security cameras are high-quality, reliable, and easy to use, and the cloud-based platform provides us with visibility and control that we never had before. The advanced analytics and features have helped us identify and address security issues more quickly and effectively, and the ability to access live and recorded video from anywhere has been a game-changer for our team.

John Lewis -Local Credit Union

Bank Security Director

SOLUTIONS FOR YOUR BUILDING AND YOUR BUSINESS

We strive to bridge the gap between construction, operations, and technology as the trusted single source provider across all components of IoT digital transformation:

Connectivity (Infrastructure) Devices (Hardware) Platform (Software) Solutions & Services

Networks

There is an increased demand on bandwidth and data across the network. Can your current network keep up with an increase in devices and the extra heat all that data brings?

Smart Security

Today, you need to be able to see what's going on at your business at all times. Protect your investment with smarter surveillance solutions. With hybrid cloud technology there are no trade-offs in reliability and flexibility.

Building Controls

Buildings are evolving with the help of technology. Intelligent Access Control, Smart Cameras, Air Sensors and Automation control are all realities thanks to IoT.

Access Control

Access control is used to identify an individual who does a specific job, authenticate them, and then proceed to give that individual only the key to the door or workstation that they need access to and nothing more.

NETWORKS

With technology rapidly evolving there is an increased demand on bandwidth and data across the network.

Many aging buildings current networks can not keep up, and so when looking to plan your next Network Cabling System you must not only keep in mind the quality of job but also the ability to scale.

After you have decided that your network needs an upgrade, we will work with you to determine the best plan of action. From there, our team of trained specialists can assist you in all things network cabling and have the experience needed to avoid problems before they arise.

SMART SECURITY SOLUTIONS

With hybrid cloud technology, there are no trade-offs in reliability and flexibility. We can help you with a solution that scales limitlessly and is effortless to use.

When it comes to your building security, you can't afford to have a second rate system and a poor install. At PBC Technology we pride ourselves in being Enterprise Security Solution trained professionals. We take into account

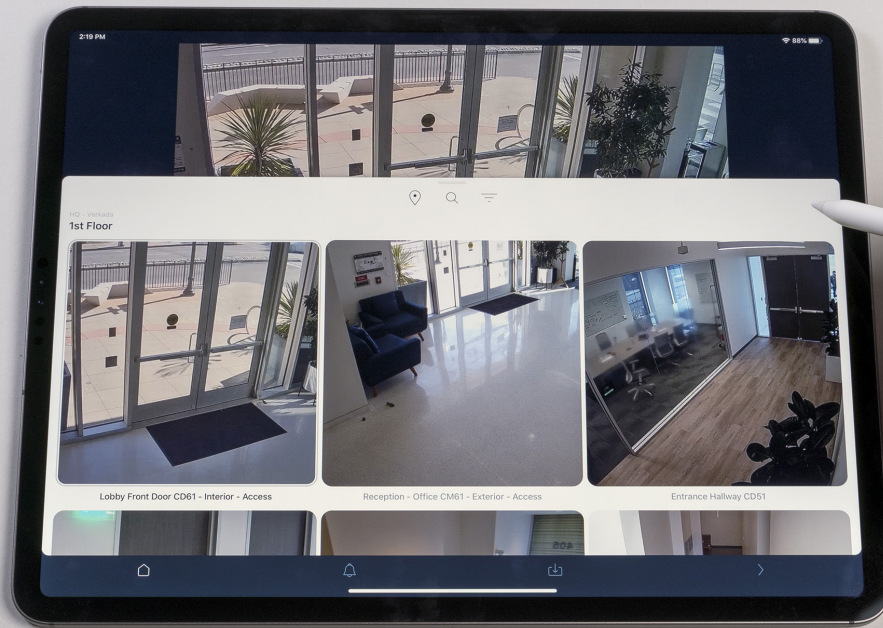

not only the surveillance system but also the network planning and installation to support the system, which is often times overlooked.

The new standard for enterprise security. With hybrid cloud technology, there are no trade-offs in reliability and flexibility.

Replace obsolete equipment with technology that's smart, secure and easy to manage.

BUILDING CONTROLS

Installation and integration of a wide range of building systems, such as lighting, HVAC, security, and access control, into a single, unified system. Create a smart building that can be easily monitored, managed, and controlled from a centralized platform. Optimize building operations, improve energy efficiency, and enhance occupant

comfort and safety. With PBC, building owners and managers can benefit from a complete, end-to-end solution that meets their unique needs and helps them achieve their goals for energy efficiency, cost savings, and sustainability.

Incorporate visitor management into your physical security measures - all within a single pane of glass.

ACCESS CONTROL

Gain real-time event visibility with seamless integration with video security, allowing you to see what's happening across all of your sites.

With remote management capabilities you can securely administrate doors, schedules and settings from any device

with cloud-based access control. And with the ability to add an unlimited number of doors, credentials and buildings to a centralized management platform, you can achieve limitless scale.

Easy-to-deploy, cloud-based solutions for every building, door and user.

PARTNER NETWORK

We've partnered with some of the best in the industry

ABOUT US

PBC Technologies is a reliable and trustworthy partner for your business, with a mission to break down the barriers of digital transformation. Our intuitive and scalable solutions are designed to be cost-effective, high performing, easy to maintain, and generate returns on intelligence for your business.

One of our greatest strengths is the ability to provide a single-source vendor experience for connected building systems and devices, which reduces wiring and installation costs, configuration time, and facilities expenses. This streamlined approach saves you time and money while ensuring that all of your systems work seamlessly together.

PBC Technologies mission is that of helping to minimize the impact of buildings on the environment by constructing sustainable facilities that reduce energy consumption, save costs, and improve workplace health and safety. This commitment to sustainability is not only good for the planet but can also be a powerful tool for improving your bottom line.

At PBC Technologies, we are our clients' trusted ally, and we work hard to do the heavy lifting so that you can get back to business. Our dedication to excellence, expertise in technology, and exceptional customer service make PBC a valuable addition to any team. As your partner, you can be confident that you are working with a company that is committed to your success.

OUR CORE VALUES

Quality **Consistency** **Efficiency** **Transparency**

PROUDLY SERVING TEXAS

We offer services throughout the great
Lone Star state

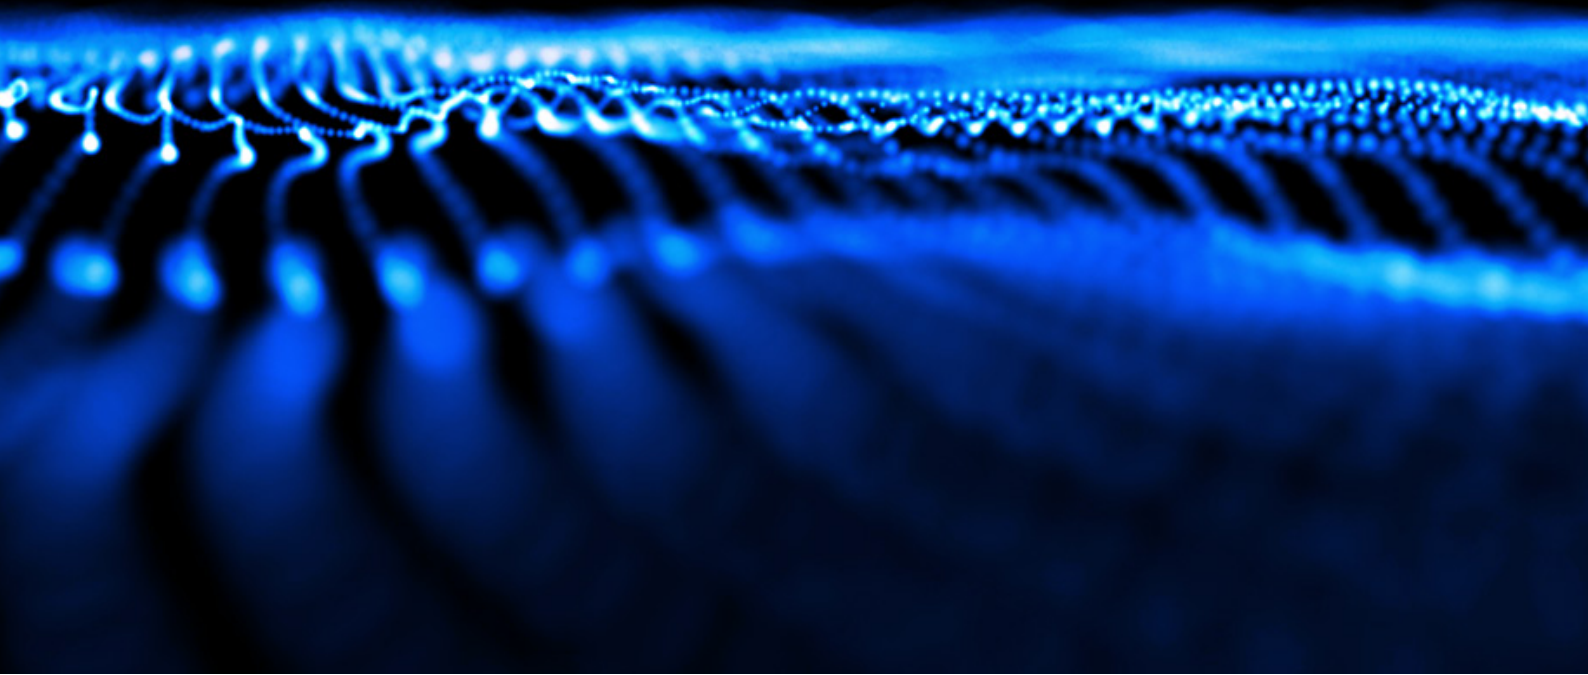

At PBC Technologies, we take great pride in being a licensed, accredited, and insured provider of network cabling systems and security solutions throughout the state of Texas. Our team of experts has the knowledge and expertise to install and manage these systems to the highest standards of quality and reliability.

The emergence of Power-over-Ethernet technology and machine-to-machine connectivity has created an increasing need for reliable structured cabling that can support a unified network infrastructure. Our team understands the importance of providing cabling solutions that are both robust and reliable to meet the needs of our clients.

We recognize that there is a growing need for end-to-end service providers across all components of IoT digital transformation, including hardware, platform (software), connectivity, solutions, and services. We are committed to providing comprehensive solutions that address all of these needs and ensure the success of our clients' digital transformation projects.

Our commitment to excellence is reflected in the quality of our work, as well as our certifications and partnerships with leading technology providers. We are constantly striving to stay up-to-date with the latest technologies and best practices to provide our clients with the most advanced and effective solutions.

Overall, you can trust PBC Technologies to provide reliable and comprehensive network cabling systems and security solutions that meet the highest standards of quality and reliability. With our focus on end-to-end service provision and commitment to excellence, we are the right partner for your IoT digital transformation needs.
